

# SA-9 Tailgate Spreader

The SA-9 tailgate spreader is designed for year-round road maintenance. For winter, the auger conveys material to the left and is dispersed through a spinner, spreading material from 4' to 40' in width. For non-winter road maintenance, the auger can be reversed, providing material discharge to the right for berming, patching, or trench filling operations.

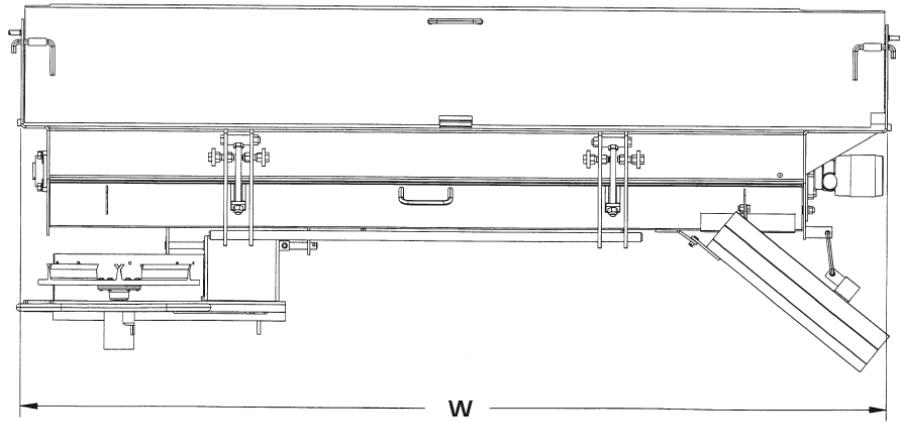

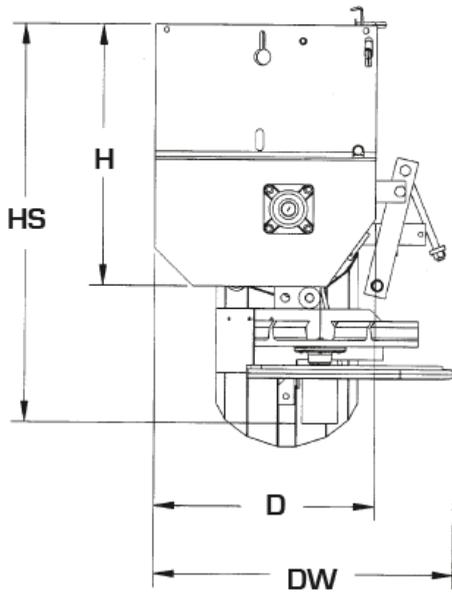

## SA-9 STANDARD FEATURES

- Heavy-duty 7-gauge cover / back plate and trough assembly with ¼" endplates.
- Easy-open hinged bottom panel provides for quick clean out of trough and the quick-disconnect hardware enables easy removal or installation.
- 9" diameter auger with 5/8" thick helicoid flighting is welded to a heavy-duty 2-1/2" schedule 80 pipe.
- 18" polyurethane spinner disc with six fins provides a uniform spread pattern from 4 to 40 feet wide. The spinner assembly can be easily removed without the need for tools and can be easily adjusted to vary the spread pattern.

## OPTIONAL EQUIPMENT

- 5:1 worm gear drive
- Twin Spinner Discharge (right and left)
- Center Discharge Option
- Dual - Spinner Discharge (right or left)
